Econometrica | The Econometric Society

The Finance doctoral program provides students with rigorous training in finance, economics, mathematics and statistics. These tools, plus opportunities for supervised independent research, enable students to make their own contributions to the understanding of financial markets and institutions that lead to productive research careers.

Robin S. Lee - Harvard University

Un'analisi econometrica è, nella più immediata delle definizioni, un confronto tra un modello economico e l'evidenza empirica. Un modello economico rappresenta un'affermazione sulla(e) relazione(i) tra diverse variabili (economiche). Un noto esempio, solitamente utilizzato per illustrare il metodo dell'econometria, è quello della

ECONOMISTS develop economic models to explain consistently recurring relationships. Their models link one or more economic variables to other economic variables (see “What Are Economic Models,” F&D, June 2011). For example, economists connect the amount individuals spend on consumer goods to …

Econometria – Wikipédia, a enciclopédia livre

24/10/2003 · This paper develops a dynamic industry model with heterogeneous firms to analyze the intra-industry effects of international trade. The model shows how the exposure to trade will induce only the more productive firms to enter the export market (while some less productive firms continue to produce only for the domestic market) and will simultaneously force the least …

Pablo Fajgelbaum - Princeton University

36 R. KOENKER AND G. BASSETT. JR. Mosteller [32], in 1946, proposed the use of a variety of so-called "inefficient statistics" based on a few sample quantiles as "quick and dirty" substitutes for more conventional estimators. It was found that estimators of this type could be …

The Durbin–Wu–Hausman test (also called Hausman specification test) is a statistical hypothesis test in econometrics named after James Durbin, De-Min Wu, and Jerry A. Hausman. The test evaluates the consistency of an estimator when compared to an alternative, less efficient estimator which is already known to be consistent. It helps one evaluate if a statistical model …
